Ques 4) Password Management free online tools
objective!-

To understand the concept of creating strong passwords and how to manage passwords using different criteria.

Activity!-

- * Create a strong password by using practical tips use online website "have I been poned" for password & email id hacking purpose.

purpose of this site!-

This site tells us whether our email or password compromised in any data breaches or not. It also suggest us how to make a strong password how this website works?

(a) working!-

This site came about after what was at the time, the largest ever single breach of customer account, analysing of user ~~over~~ credential and keep finding the same account exposed over & over again.
