VIKES SINGH PANWAR BSc (1T) (1022772) Ans 74 Password managements are set of strings provided by users at the authentication prompts of web accounts. Although passwords still remain as one of the most secure methods of authentication available to Sate, they are subjected to a no. of sourity throads when mishandled. Password management using free online tooks. passuosed manager is a computer program that allows users to store, generate, and manage their passwords for local applications se deices Types of password monager includes:

7 locally installed software applications 7 online services accessed through
7 locally mistaired surges of through
-) Online services accessed
website portals.
-) locally accessed hardware devices that
serve as koys.
The advantage of passwood -based access
controls is that they are easily incorporated
The advantage of passwood-based access controls is that they are easily incorporated in most software using APIs available in many software products.
many coffusion products.
